

Dinan van Wijk

Enthusiastic Software Development student in the final phase of his studies.

18-05-2005

Profile

The continuous development within IT and software development and what happens behind the scenes has interested me for a long time.

My motivation derives from taking on challenges and turning an idea into a meaningful and user-friendly solution.

I am not someone who likes to sit still and can work in a structured way, but I also enjoy working together on projects. After receiving a task, I prefer to get started as quickly as possible.

Objective

I am currently looking for a new challenge; a position where I can apply my skills and grow as a professional. I am also open to following additional courses or (further) education.

Experience

Web Development Intern (Graduation Internship)

Aug. 2025 - Mar. 2026

Imagine Creative Agency, Tholen

- Set up a website for a client campaign including basic analysis.
- Further specialization in web development (frontend and backend) and web-based hybrid applications for mobile devices.
- Worked on and contributed to various (internal) applications.
